

# SpecialtyCompass™

## Collaboration Resulting in Better Outcomes

Our proven approach employs complete solutions and professional collaboration to make meaningful change. Our team of nurse case managers licensed clinical social workers and clinical pharmacists review each case and work in collaboration to empower the patient to make educated and appropriate medical decisions.

- ✓ Medications are administered in a clinically appropriate setting at a rational price
- ✓ Networks to support evidence based medicine treatment pathways
- ✓ Wide array of benefit tools to ensure clinically appropriate therapy
- ✓ Patient, provider and caregiver support system designed to be efficient and deliver the best health outcome
- ✓ Meaningful trend reductions

## Specialty Management By Specialty Experts

VRx is leading the way with effective specialty management. Our approach is unique and successful, engaging physicians and patients in the outcome of care. We are able to achieve significant savings through SpecialtyCompass, our exclusive program designed to help plans and members navigate through the unknown territory of specialty treatments. We are the specialty experts.

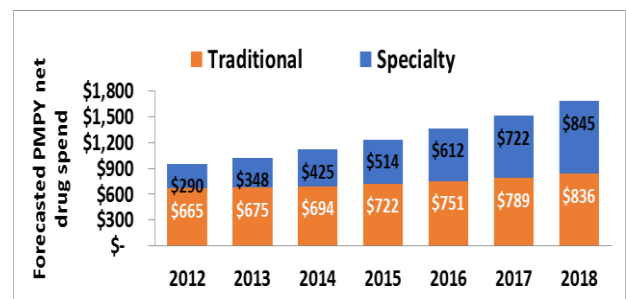

## NOW MORE THAN EVER

It's estimated that by 2018, the PMPY will double from 2012 and specialty medication will account for 50% of total pharmacy spend. Now is the time to implement appropriate member cost sharing and modify benefit design – before utilization exceeds allocated budgets.

## RIGHT TOOLS & STRATEGIES

Our evidence based approach results in immediate savings for our clients because 74% of our recommendations are followed by physicians. Graphic by Artemetrx.

- Flexibility in benefit design
- Utilization management
- Reimbursement strategies
- Formulary optimization
- Channel management
- Physician recommendations
- Integration of medical and pharmacy

## ALIGNED INCENTIVES

SpecialtyCompass has no up-front charges. VRx implements and executes the program at our expense (takes risk) and is only rewarded with a small percentage of savings generated

## Specialty Drug Trend: Time to Take Control

It's estimated that by 2018, the PMPY will double from 2012 and specialty medication will account for 50% of total pharmacy spend. Now is the time to implement appropriate member cost sharing and modify benefit design – before utilization exceeds allocated budgets.
